The Alliance for Responsible Mining (ARM) launches updated Fairmined certification system authorizing IMOSwiss AG (IMO) as Fairmined certification body for mining organisations

The Alliance for Responsible Mining (ARM) and IMOSwiss AG (IMO) are happy to announce the signing of the final contract authorizing IMOSwiss AG to deliver sustainable, credible and transparent auditing and certification services to Artisanal and Small-scale Mining Organisations against the Fairmined Standard.

The launch of the certification and auditing system follows the recent publication of version 2.0 of the Fairmined standard that includes some important changes to provide new opportunities for Artisanal and Small-scale miners globally and for the market. The Fairmined Standard for gold and associated precious metals was developed with ARM's network for responsible mining and includes requirements for traceability, social development, conflict mitigation, economic development, environmental protection and labour conditions.

The Artisanal and Small-scale Mining Organisations wishing to be certified are audited by IMOSwiss AG that will determine their compliance with the Fairmined Standard requirements for mining. Certified Artisanal and Small-scale Mining Organisations receive a Fairmined minimum price for their gold and a premium, which is reinvested into community projects and improved mining operations. After obtaining certification the organisations undergo annual audits to assure their compliance with the development approach of the standard and their continuous improvement of conditions at mines, processing units and in the surrounding communities.

"IMOSwiss AG has a long track record in independent third party certification and we are very pleased to have such a well-recognized and experienced certification body on board as a part of our Fairmined certification system." Said Ronald Koepke from the Alliance for Responsible Mining.

"We are proud to have been chosen as a Fairmined certification body. The Alliance for Responsible Mining is an organisation that has proven its commitment to the development of mining communities and is making a real difference in the sector through their work with the rigorous Fairmined standard" Said Philipp Wagner Scheme manager from the Social and Fair Trade Department at IMOSwiss AG.

The certification and auditing system is in line with international recognised procedures and methodologies for third party certification and auditing systems, and shall provide all users with transparent and comprehensive

information on requirements, fees and procedures. All the relevant documents related to the certification process for mining organizations are available at ARM's website www.communitymining.org.

About the [Alliance for Responsible Mining \(ARM\)](#)

- **The Alliance for Responsible Mining (ARM)** is an independent, global-scale, pioneering initiative established in 2004 to enhance equity and wellbeing in artisanal and small-scale mining (ASM) communities. ARM is committed to social justice and environmental responsibility as the values driving the transformation of ASM.
- **ARM's vision** is for ASM to become a formalized, organized and profitable activity that uses efficient technologies and is socially and environmentally responsible. **ARM's work** is focused on four strategic areas: Standard Setting, Producer Support, Market Development and Advocacy and Communications.
- On the local level ARM works through local organizations such as Cumbre del Sajama in Bolivia, ASOMIRCOL in Colombia and Red Social in Peru.
- **Fairmined Gold** is ethical gold extracted by Artisanal and Small-scale miners certified under the **Fairmined Standard**. Fairmined gold is the achievement of the world's pioneering and industry leading network of responsible Artisanal and Small-scale miners. An initiative and movement led by and for the miners. The Fairmined model is open to all market players wishing to make a positive impact on responsible mining.
- Currently, almost 30 mining organizations are working towards certification in Latin America. Furthermore, ARM partners with UNIDO, GEF, FFEM and AGC to begin the certification process for ASM communities in Senegal, Burkina Faso and Mali; and in 2012 the organization began the expansion of its efforts into Mongolia.

About the [Institute for Marketecology \(IMO\)](#)

- The **IMOgroup AG** with about 400 staff members in 11 independent entities and over 20 international contact offices is active worldwide in the certification of organic and sustainable products for over 20 years. Today IMO is among the experts in the sectors of Fair Trade & Social Responsibility, natural textiles, responsible forest management, sustainable fisheries & aquaculture as well as wild collection. IMO is a pioneer in all these fields and has given important impulses for development. IMO is providing its service according to 70 different environmental and social standards in over 90 countries. With about 60 staff members and many international experts **IMOsuisse AG** is the largest office within the IMO Group as well as part of the international ECOCERT Group.
- **IMO's vision** is to build bridges between local providers and responsible-minded consumers as the reliable partner for high quality control and certification of organic, eco-friendly and socially-responsible products.
- For many years, IMO and a number of its inspectors have been active in the field of **fair trade and social accountability auditing**. Special expertise has been developed in the field of smallholder group quality assurance schemes (ICS).
- IMO has been actively **involved in various standard development processes** and has developed several social and environmental standards such as for example the brand neutral, third party Certification Programme for Social Responsibility ("**for Life**") and Fair Trade ("**Fair for Life**"), including development of audit and certification methodology. The Fair for Life Certification Programme and IMO's Fair for Life audit and certification service has gained quick acceptance and is well-known in high quality markets worldwide. More than 200 operations worldwide are currently certified against the Fair for Life Programme.
